

CONTENTS**Photographic Feature:**

Underpinning a Medium-Rise Building with Micropiles – A Case History

by W.H. Ting and R. Nithiaraj

i

Main Papers:

Downdrag Settlement of a Single Floating Pile

by W.H. Ting

83

Undrained Shear Strength of the Singapore Marine Clay at Changi from In-Situ Tests

by Bo Myint Win, M.F. Chang, A. Arulrajah and V. Choa

91

Numerical Modeling of Prefabricated Vertical Drain

by D.G. Lin, H.K. Kim and A.S. Balasubramaniam

109

Vibration Characteristics of Roads Constructed on Soft Clay

by K. Koga, N. Miura and K. Itoh

127

Limit Equilibrium Analysis of the Cherry Hills Slide

by S.F. Reyes

141

Technical Note:

Strong Ground Motions Recorded in Indonesia

by H. Hao
