

CONTENTS

Main Papers:

Risk Evaluation of Slope Failure Induced by Rainfall using the Simplified Storage Tank Model <i>by H. Ohtsu, S. Janrungautai, K. Takahashi, N. Supawiwat and Y. Ohnishi</i>	157
Studies on Pullout Behaviour of Pile Anchors under Oblique Loading <i>by S. Narasmha Rao, K. Hemalatha and S. Surendran</i>	165
Studies on Underreamed Piles in Expansive Soils by Thermal Analogy <i>by N.P. Kurtan and G. Srilakshmi</i>	173

Technical Note:

A Simplified Approach of Stability Analysis for Nailed Earth Slopes <i>by Y.S. Hong and C.S. Wu</i>	185
Significance of Fabric Deformation Shape at Subgrade in Design of Reinforced Flexible Pavements <i>by C.N.V. Satyanarayana Reddy and N.V. Rama Moorthy</i>	195
