

SEAGS-AGSSEA Journal Report to Taipei Meetings in October 2019

1. Currently Dr. Erwin Oh and Dr. Dominic Ong both from Malaysia are at Griffith University and help me with my involvements with SEAGS-AGSSEA
2. Dr. Ooi Teik Aun takes the leading role on the Journal and it is a pleasure for me to help him. Dr Ooi also checks all contents of the journal prior to release. Also, raise the funds and prepare the hard volume of the journal
3. The involvement in the journal by Dr. Ooi and me follow the Taipei GC Meeting held in Taipei in 2010 during our regular SEAGC.
4. All material related to the Journal can be found in SEAGS-AGSSEA website: <http://seags.ait.asia/journals/>
5. I will divide this report into two parts.

Part 1 Among other things covers the period 2010 to 2019: During this period, the journal was always published spot on time. The material for the period presented here contains, the Editors & Guest Editors, Table of contents, Preface and other items

Part 2 is for the period following 2019; covering at present up to 2022. For this period, the annual status is presented.

6. Dr. Geoff Chao the SG of SEAGS and Khun Ta at AIT has been fully co-operative and helping me with my activities related to the journal and other matters.
7. I more or less send material to all Council members, very frequently and this is some time on a daily basis: the material presented here has already been circulated many many times.
8. With my experience since 1973, now the interest in the journal lays mainly in SE Asian nations, also the ISSMGE member countries in Asia and elsewhere. We enjoyed tremendous support from Japan; many thanks to our Japanese Colleagues.
9. Finally, I will not be in Taipei: this report will be presented by Dr. Ooi & Dr. Geoff Chao. Dr. Erwin Oh and Dr. Dominic will be there in Taipei. I have virtually interacted with almost all the geotechnical personalities in SEAGS and AGSSEA Member countries and grateful for all their contributions. I simply function as a Facilitator.
