

2nd Thai Conference

Very pleased to see many known personalities in the 2nd Thai Conference Key Note Speakers. Dr. Moh did many projects and especially the Airport Project-- I have known him since 1973. Prof. Prinya and I were colleagues since 1975. Prof. Prinya is an Engineer-Engineering Geologist. The prime architect and Principal Investigator of Bangkok Subsidence. Everyone uses his work on Subsidence measurement. Khun Somkuan was there from Khun Kasem & Khun Lek time.

We had a magnificent Dam conference at AIT. Khun Narong did excellent work on Bored Piled foundations. I specially met him 2002 before my departure from BKK. I am sure it will be an excellent Conference.

Bala

Geotechnical Investigation at Nong Ngo Hao Airport Site

Phase	Year	Title
I	1972 - 1974	Geotechnical Investigations by Asian Institute of Technology and N.D. Lea and Associates, Kampsax
