GEOTECHNICAL ENGINEERING

Paper Contribution, Technical Notes, and Discussions

Geotechnical Engineering is the official journal of the Southeast Asian Geotechnical Society and the Association of Geotechnical Societies in Southeast Asia. It is published four times a year in March, June, September, and December and is free to members of the Society. Please visit our website at <http://www.seags.ait.ac.th> for the membership information.

SEAGS & AGSSEA encourage the submission of scholarly and practice-oriented articles to its journal. The journal is published quarterly. Both sponsors of the journal, the Southeast Asian Geotechnical Society and the Association of Geotechnical Societies in Southeast Asia, promote the ideals and goals of the International Society for Soil Mechanics and Geotechnical Engineering in fostering communications, developing insights and enabling the advancement of the geotechnical engineering discipline. Thus, the publishing ethics followed is similar to other leading geotechnical journals. The standard ethical behavior of the authors, the editor, and his editorial panel, the reviewers, and the publishers is followed.

Before you submit an article, please review the guidelines stated herein for the manuscript preparation and submission procedures. The paper template is available upon request.

Geotechnical Engineering Journal accepts submissions via electronic. The manuscript file (text, tables, and figures) in both words and pdf format, together with the submission letter, should be submitted to the Secretariat and copied to the Chief Editor of Geotechnical Engineering Journal. Email: s-a-journal@ait.ac.th.

The guidelines for authors are as follows:

1. The manuscript including abstract of not more than 150 words and references must be typed in Times New Roman 9 on one side of A4 paper with a margin of 25 mm on each side. The abstract should be written clearly stating the purpose, the scope of work, and procedure adopted together with the major findings including a summary of the conclusions.
2. The paper title must not exceed 70 characters including spaces.
3. The maximum length of papers in the print format of the Journal is 12 two-column pages in single-spaced in Times New Roman 9 including figures and tables. A Journal page contains approximately 1,040 words. Authors can approximate manuscript length by counting the number of words on a typical manuscript page and multiplying that by the number of total pages (except for tables and figures). Add word-equivalents for figures and tables by estimating the portion of the journal page each will occupy when reduced to fit on a 160 mm x 240 mm journal page. A figure reduced to one-quarter of a page would be 260 word-equivalents. When reduced, the figure must be legible and its type size no smaller than 6 point font (after reduction).
4. Figures: Line art should be submitted in black ink or laser printed; halftones and color should be original glossy art. Figures should be submitted at the final width, i.e., 90 mm for one column and 185 mm for two columns. The font of the legends should be in Times New Roman and should use capital letters for the first letter of the first word only and use lower case for the rest of the words. Background screening and grids are not acceptable.
5. Each table must be typed on one side of a single sheet of paper.
6. All mathematics must be typewritten and special symbols identified. Letter symbols should be defined when they first appear.
7. The paper must have an introduction and end with a set of conclusions.
8. Practical applications should be included, if appropriate.
9. If experimental data and/or relations fitted to measurements are presented, the uncertainty of the results must be stated. The uncertainty must include both systematic (bias) errors and imprecisions.
10. Authors need not be Society members. Each author's full name, Society membership grade (if applicable), present title and affiliation, and complete mailing address must appear as a footnote at the bottom of the first page of the paper.
11. Journal papers submitted are subject to peer review before acceptance for publication.

12. Each author must use SI (International System) units and units acceptable in SI. Other units may be given in parentheses or in an appendix.
13. A maximum of five keywords should be given.
14. References

GEOTECHNICAL ENGINEERING

TABLE OF CONTENTS

<u>List of Papers</u>	<u>Page</u>
1. The Effect of Compaction Effort on Shear Strength Parameters of Low/High Plasticity Clay Soils <i>By M. Yamin, M. F. Attom, S. Atabay, and R. Vandanapu</i>	1-8
2. Using a Stochastic Model to Study the Ground Motion of Comprehensive Subsurface Structure <i>By C. H. Hsu, S. J. Chao, S. G. Chern, and H. Hwang</i>	9-16
3. The Effect of the Inclined Core of the Earth Fill Dam on the Settlement Rate <i>By A. M. Ghaemi, B. K. Ahangari, C. A. Noorzad, and D. K. Goshtasbi</i>	17-23
4. The Boundary Condition of a 3D Continuum Model for a Quasi 2D Plane Strain Condition <i>By S. Chaiyaput and M. Sugimoto</i>	24-30
5. 3D Evaluation of PWP Development Due to Tunnel Excavation in an Over Consolidated Clay <i>By D. L. Vettorello, F. A. M. Marinho, and P. D. G. Orlando</i>	31-38
6. Seismic Behaviour of Complex H-Shaped Buried Structures <i>By B. Salehi, A. Bahmanpour, and M. Derakhshandi</i>	39-47
7. Settlement's Prediction of Piles in Tropical Soil <i>By P. H. L. Bezerra, A. S. Moura, F. C. da Silva Filho, F. V. C. G. Filho, and E. Cerqueira Junior</i>	48-55
8. Cyclic Resistance of High Plasticity North Java Clays and Silt <i>By E. Rismantojo, E. Ginting, and M. Ochoa</i>	56-62
9. Durability of Erosion Control Geomesh of Paddy by 'Accelerated Biodegradation Test' <i>By S. Halkude and R. Katdare</i>	63-68
10. Stability Analysis of an Overall Failure Excavation Case in Hang Zhou <i>By T. N. Do</i>	69-71
