What is pile foundation...?

The pile foundation is used to describe a construction for the foundation of a wall or a pier, which is supported on the pile.

Where it is placed.....?

The piles may be placed separately or they may be placed in a cluster at a column or along the load-bearing wall.

Where it is adopted.....?

Piles are adopted when the loose soil extended to a great depth. The load of the structure is transmitted by the piles to hard stratum below or it is resisted by the friction developed on the sides of the piles.

BRIEF OUTLINE OF THE SHORT COURSE

- ✓ Introduction – application of piles, effects of installation
- ✓ Ultimate axial pile capacity
- ✓ Settlement of piles and pile groups
- ✓ Lateral response of piles and groups
- ✓ Effects of ground movements on piles
- ✓ Load testing
