

Geotechnical Group Technical Reports 1970 - 2009

348	<u>CAM-Sat: Computer controlled saturation for geotechnical modelling</u>	ME Stringer BT McMahon SPG Madabhushi	2009
345	<u>Use of inclined micro-piles as a lequefaction remediation method for existing buildings - Data report on centrifuge tests MP1, MP2 and MP3</u>	H Mitrani S P G Madabhushi	2006
344	<u>Use of cemented zones as a lequefaction remediation mthod for existing buildings - Data report on centrifuge tests CZ1P CZ1F and CZ3</u>	H Mitrani S P G Madabhushi	2006
343	<u>Use of containment walls as a liquefaction remediation method for existing buildings - Data report on centrifuge tests WA1P, WA1F and WA3</u>	H Mitrani S P G Madabhushi	2006
342	<u>Frame structures founded on liquefiable soil - Data report on centrifuge tests BM1, BM2 and BM3</u>	H Mitrani S P G Madabhushi	2006
341	<u>The Effect of Ground Settlements on the Axial Response of Piles: Some Closed Form Solutions</u>	A Klar K Soga	2005
340	<u>Cracking in clay – data report on cracking of clay beams by 4-point beam tests</u>	N I Thusyanthan S P G Madhabushi A W Take M D Bolton	2005
339	<u>Integrity of landfills founded on liquefiable foundation - Data report on centrifuge tests IT05, IT07 and IT08</u>	N I Thusyanthan S P G Madhabushi	2005
338	<u>Tensile behaviour of geomembrane on landfill slopes - Data report on centrifuge tests IT04 and IT06</u>	N I Thusyanthan S P G Madhabushi	2005
337	<u>Seismic behaviour of Municipal Solid Waste (MSW)- Data report on centrifuge tests IT02, IT03 and IT09</u>	N I Thusyanthan S P G Madhabushi	2005
336	<u>Evaluation of Shear Modulus and Damping in Dynamic Centrifuge Tests</u>	A J Brennan N I Thusyanthan S P G Madhabushi	2004
334	<u>Continuum Solution of Lateral Loading of Large Pile Groups</u>	A Klar A D Spasojevic K Soga	2004
333	Unavailable		2004
332	<u>Soil-Pipe-Tunnel Interaction: Comparison Between Winkler and Elastic Continuum Solutions</u>	A Klar T E B Vorster K Soga R J Mair	2004
331	<u>Behaviour of Rigid Foundation on Layered Soil: Data report on tests BG-04 to BG-08</u>	B Ghosh S P G Madhabushi	2004

330	Behaviour of Rigid Foundation on Homogeneous Loose Soil: Data report on tests BG-01 to GB-03	B Ghosh S P G Madhabushi	2004
328	A reconsideration of the safety of piled bridge foundations in liquefiable soils	S Bhattacharya S P G Madhabushi M D Bolton S K Haigh K Soga	2003
327	Field measurements of CPT and pile base resistance in sand	D J White	2003
326	Scaling of seepage flow velocity in centrifuge models	S P G Madhabushi N I Thusyanthan	2003
325	Drum centrifuge modelling of displacement piles in sand: data report	D J White O S Ong B M Lehane	2003
324	An alternative mechanism of pile failure in liquefiable deposits during earthquakes	S Bhattacharya S P G Madhabushi M D Bolton	2002
323	Micro-geomechanics	M D Bolton Y P Cheng	2002
322	GeoPIV: Particle Image Velocimetry (PIV) software for use in geotechnical testing	D J White W A Take	2002
321	The measurement of particle size distribution using the Single Particle Optical Sizing (SPOS) method	D J White	2002
320	Integral bridge abutments	R J Lock	2002
319	Uplift resistance of buried submarine pipelines, comparison between centrifuge modelling and full-scale tests	A J Baumgard A C Palmer D J White M D Bolton A J Barefoot M Finch T Powell A S Faranski J A S Baldry	2002
318	Effects of lateral spreading on pile foundations; Data report on tests SKH-13-17	S K Haigh	2002
317	Lateral Spreading of slopes; Data report on tests SKH-5-12	S K Haigh	2002
316	Re-appraisal of Terzaghi's soil mechanics	A N Schofield	2001
315	Particle Shape characterisation using Fourier Analysis	E T Bowman K Soga T W Drummond	2000
314	Centrifuge Modelling of upheaval buckling in sand	D J White A J Barefoot M D Bolton	2000
313	The role of micromechanics in soil mechanics	M D Bolton	2000

312	Analysis of earthquake motions recorded during the Kocaeli earthquake , Turkey 1999	B Teymur S P G Madabhushi D E Newland	2000
311	Behaviour of a Soil Paste Continuum	A N Schofield	2000
310	Liquefaction and dam failures	B Muhunthan A N Schofield	1999
309	2D NAPL experiments using the CU gamma-radiation system	H Coumoulos C Kechavarzi K Soga T Illangasekare	1999
308	Geotechnical Centrifuge Development can correct a soil mechanics error	A N Schofield	1998
307	The "Mohr Coulomb" (MC) error correction	A N Schofield	1998
306	Application of Homogenisation model to improved ground with cement-treated soil columns	K Omine M D Bolton	1998
305	The "Mohr-Coulomb" error	A N Schofield	1998
304	A bench-scale test series for seabed soils	A S Faranski	1997
303	Modelling of embankment construction on soft clay in the Mk II mini-drum centrifuge	H R Barker N Sartain A N Schofield K Soga	1997
302	Study of pollutant spillage and electrokinetic soil remediation	C Savvidou M Penn	1996
301	Modelling the transport of a pulse of two contaminants through a clay layer	J D McKinley B A Price A N Schofield	1996
300	Seismic modelling of embankments on saturated soil deposits	L M N Peiris S P G Madabhushi A N Schofield	1996
299	Extracting pattern from scattered data -applicability of artificial neural networks to the interpretation of bearing capacity data	J D McKinley	1996
298	Preliminary centrifuge tests using the Stored Angular Momentum (SAM) earthquake actuator -Phase I	S P G Madabhushi	1996
297	-	-	-
296	A thermally controlled test chamber for centrifuge and laboratory experiments	K J L Stone C C Smith A N Schofield	1995
295	-	-	-
294	-	-	-
293	Theoretical modelling of spudcan behaviour under combined load	E T R Dean R G James	1996

		A N Schofield Y Tsukamoto	
292	Numerical modelling of the electrokinetic remediation of heavy metal contaminated soil	J D McKinley C Savvidou	1997
		E T R Dean Y S Hsu	
291	Centrifuge modelling of jackups and spudcans on drained and partially drained silica sand	R G James T Sasakura A N Schofield Y Tsukamoto	1995
		E T R Dean	
290	Numerical modelling of three-leg jackup behaviour subject to horizontal load	R G James A N Schofield Y Tsukamoto	1995
		E T R Dean	
289	Drum centrifuge study of three-leg jackup models on clay	R G James A N Schofield Y Tsukamoto	1996
288	GEOCRISP -A version of CRISP93 for Geosynthetic- soil applications	J S Sharma	1995
287	Finite element simulation of sand indentation into saturated soft clay	H Akagi	1995
286	A new technique for simulation of collapse of a tunnel in a drum centrifuge	J S Sharma M D Bolton	1995
285	Strong motion at Port Island during the Kobe earthquake	S P G Madabhushi	1995
		M C Barbosa	
284	Migration of aqueous acetone and KCl through E-Kaolin: minidrum centrifuge test CBLCI	R J Lynch J D McKinley	1995
283	-	-	-
282	Measurement of small strains using semiconductors in centrifuge tests	C W W Ng	1995
281	Centrifuge modelling of inertial loading and pore pressure effects beneath sandslopes	N K Pilgrim	1994
280	A user's guide to the STRAINS program (Version 10 for IBM PC & Compatibles)	J S Sharma	1995
		C W W Ng M D Bolton G R Dasari	
279	The small strain stiffness of a carbonate stiff clay		1994
		S M Springman	
278	Centrifuge and analytical studies of full height bridge abutment on piled foundation subjected to lateral loading	C W W Ng E A Ellis	1994
277	Modelling of deformations in dynamic soil-structure interaction problems	S P G Madabhushi	1996

276	A strain-dependent modified Cam Clay model in CRISP and its evaluation	G R Dasari A M Britto	1995
275	Small strain measurement using modified LDTs	G R Dasari MD Bolton C W W Ng	1995
274	Bridge foundations on liquefiable sand layers	S P G Madabhushi	1995
273	Natural frequency of a horizontal soil layer -Part II: Saturated sand bed	S P G Madabhushi	1994
272	Stress wave propagation in a centrifuge model	S P G Madabhushi	1994
271	Natural frequency of a horizontal soil layer -Part 1: Dry sand bed	S P G Madabhushi	1994
270	Dynamic response of the equivalent shear beam (ESB) container	S P G Madabhushi	1994
269	Consolidation and pollutant transpon associated with slurried mineral waste disposal	L J Potter C Savvidou R E Gibson	1994
268	A study of contaminant transport involving density driven flow and hydrodynamic clean up	E E Hellawell C Savvidou	1994
267	Development of a new apparatus for centrifuge testing of offshore jack-up platform models and Data report for centrifuge test YSHI: 3-leg jack-up model with flat spuds on dense water-saturated sand	E T R Dean Y S Hsu R G James A N Schofield	1993
266	Soil grouting in the mini-drum centrifuge	M D Bolton C Y Chin	1994
265	Centrifuge modelling of reinforced embankments on soft clay: objective data report	J Sharma	1993
264	Frost heave of pipelines: centrifuge tests and 1g tests	X Chen A N Schofield C C Smith	1993
263	Modelling of contaminated land reclamation	E E Hellawell C Savvidou J R Booker	1993
262	Centrifuge modelling of environmental geomechanics	P J Hensley C Savvidou	1993
261	Tower construction on layered ground Data of beam centrifuge tests	R Phillips	1992
260	Centrifuge modelling in clay: marine applications	S M Springman	1993
259	Original Cam Clay	A N Schofield	1993
258	-	-	-
257	Contaminant migration through clay in a mini-drum centrifuge	D C Evans C Savvidou A N Schofield	1993
256	The study of relative density and boundary effects for cone penetration tests in a centrifuge	M D Bolton M W Gui	1992

255	The seismic response of gravity type quay walls	X Zeng	1991
254	An analysis of the resonant shaker for centrifuge modelling	S P G Madabhushi	1992
253	Wave action on submerged causeway Data of drum centrifuge tests	R Phillips H Sekiguchi	1992
252	Modelling the seismic response of block buildings	X Zeng	1992
251	Dynamic centrifuge tests on quay wall models	X Zeng	1992
250	Clean up operations in contaminated land	E E Hellawell C Savvidou J R Booker	1992
249	Water wave trains in a drum centrifuge	R Phillips H Sekiguchi	1991
248	-	-	-
247	-	-	-
246	Film measurement machine, User manual	R Phillips	1991
245	Design and performance of an equivalent-shear-beam (ESB) container for earthquake centrifuge modelling	A N Schofield X Zeng	1992
244	Combined vertical, horizontal, and moment loading of circular spuds on dense sand foundations, Data report for drum centrifuge model tests YT-IL-A thru-G and YT2-1L-G thru-V	E T R Dean R G James A N Schofield Y Tsukamoto	1992
243	Complementary shear stresses in dynamic centrifuge modelling	S P G Madabhushi A N Schofield X Zeng	1992
242	Centrifuge modelling of tower structures	S P G Madabhushi	1991
241	Design of the Cambridge dynamic shear box	X Zeng	1991
240	Some potential approximate methods for the preliminary estimation of excess pore pressures and settlement-time curves for submerged circular spud foundations subjected to time-dependent loading	E T R Dean	1991
239	Data of centrifuge tests on quay walls	X Zeng	1991
238	Numerical modelling of dynamic centrifuge tests on sand embankments using DIANA-SW ANDYNE	I Miyakoshi A N Schofield	1990
237	Numerical simulation of initial velocity/displacement conditions in dynamic centrifuge modelling	S P G Madabhushi	1990
236	Wave propagation in sand medium	R S Steedman S P G Madabhushi	1990
235	Soil stiffness and damping	M D Bolton J M R Wilson	1990
234	The application of dynamic geotechnical centrifuge model test data to design	R S Steedman X Zeng A Maheetharan	1990

233	Hydrodynamic pressures on a flexible quay wall	R S Steedman X Zeng	1990
232	Consolidometer tests on fresh cement group	M D Bolton J D McKinley	1990
231	The behaviour of bridge abutments on clay	M D Bolton S M Springman H W Sun	1989
230	An alternative to the advection-dispersion equation developed for the case of one-dimensional flow	E T R Dean	1990
229	Centrifuge modelling of large ground motions and their effects on structures	R S Steedman	1989
228	The seismic response of waterfront retaining walls	R S Steedman X Zeng	1989
227	Wave transmission at a multi-media interface	R S Steedman S P G Madabhushi A H C Chan	1989
226	Use of compound parabolic collectors in the modelling of semi-infinite soil media	R S Steedman S P G Madabhushi A H C Chan	1989
225	Numerical modelling of soil under dynamic loading	R S Steedman S P G Madabhushi A H C Chan	1989
224	Isotropic transformation models for finite axial strain events	ETR Dean	1989
223	Development and some consequences of a proposed new fundamental constitutive assumption for isotropic soils with induced anisotropy "Axiom 1"	ETR Dean	1989
222	The influence of phase on the calculation of pseudo- static earth pressure on a retaining wall	R S Steedman X Zeng	1989
221	Dynamic response of deep foundations	R S Steedman C W Felice E S Gaffney	1989
220	Drum centrifuge modelling of long term pollutant migration through a soil layer	R I Edwards	1988
219	Cambridge Soil Mechanics Group Ph.D., M.Sc., & M.Phil. theses summaries		1988
218	Recent development of dynamic model testing in geotechnical engineering	A N Schofield X Zeng	1988
217	Flexible anchored walls subject to base shaking	R S Steedman X Zeng	1988
216	Modelling the dynamic response of piles in dry sand	R S Steedman A Maheetharan	1988

215	Triangular continuum mechanics Vol. 1 Theory of homogeneous deformation	E T R Dean	1989
214	Drum centrifuge study of the transport of leachates from landfill sites	J R Gronow R I Edwards A N Schofield	1988
213	Geotechnical centrifuge modelling in 1988	A N Schofield	1988
212	Pollution migration at 500 g	F Poorooshab A N Schofield	1988
211	Two programs for solving the biharmonic equation	F Poorooshab	1987
210	An experimental investigation of factors affecting penetration resistance in granular soils in centrifuge modelling	R Phillips A Valsangkar	1987
209	-	-	-
208	Modelling laterally loaded piles in calcareous sand	I L Nunez R Phillips M F Randolph B D Wesselink	1987
207	Driving & tension loading of piles in sand on a centrifuge	I L Nunez P K Hoadley M F Randolph J M Hulett	1987
206	Data report of three dynamic centrifuge model tests on piles and pile groups	A Maheetharan R S Steedman	1987
205	Some observations of faulting in soft clays	K J L Stone D M Wood	1987
204	FLY 14 user manual	ETR Dean K Edgcombe	1988
203	Data report for centrifuge test RDO9/1	E T R Dean	1987
202	Data report of 2 dynamic centrifuge model tests of free cantilever retaining walls	X Zeng R S Steedman	1987
201	-	-	-
200	-	-	-
199	Anisotropic elasticity & yielding of a natural plastic clay	D M Wood J Graham	1987
198	Experimental observations of anisotropy in some stress controlled tests on dry sand	H Alawaji M Alawi H Y Ko S Sture J F Peters D M Wood	1987
197	Model studies of soil deformations over a moving basement	K J L Stone D M Wood	1987
196	Some observations on the interpretation of shear box results	D W Airey	1987

195	Dynamic testing of soil elements and centrifuge models of soil structure interaction problems	E T R Dean	1987
194	Earthquake response of embankment dams -data report	E T R Dean	1987
193	Ocean disposal of high level radioactive waste	J Gronow	1986
192	Ocean disposal of high level radioactive waste	C Savvidou A N Schofield	1986
191	Finite element analyses of a hot canister buried in kaolin clay	A Britto	1984
190	Ocean disposal of high level radioactive waste. Centrifuge modelling of heat transfer around canisters installed in submerged kaolin. Part 3	D V Maddocks C Savvidou	1983
189	Ocean disposal of high level radioactive waste. Centrifuge modelling of heat transfer around canisters installed in submerged kaolin. Part 2.	D V Maddocks C Savvidou	1983
188	Ocean disposal of high level radioactive waste. Centrifuge modelling of heat transfer around canisters installed in submerged kaolin. Part 1.	D V Maddocks C Savvidou	1983
187	Ocean disposal of high level radioactive waste. Centrifuge modelling of high level radioactive waste placed in the deep ocean bed as a projectile	D V Maddocks C Savvidou	1987
186	An evaluation of direct simple shear tests on clay	D W Airey D M Wood	1987
185	Modelling the failure of coastal dykes during earthquake	R S Steedman A Habibian	1986
184	-	-	-
183	Some measurements of the permeability of kaolin	A Al Tabbaa D M Wood	1986
182	An analysis of a problem involving radial consolidation	A Al- Tabbaa D M Wood	1986
181	-	-	-
180	Aspects of program TARA-2 in the dynamic analysis of sand foundations	A Habibian R S Steedman	1986
179	A fully plastic model for sand in 6-dimensional stress and strain	K V Venter R S Steedman	1986
178	The Mexico earthquake of 19.9.85: some lessons for the engineer	E Booth J Pappin J Mills	1986
177	A data report on model diaphragm walls in clay	D Stewart	1986
176	SWFLIB and SWFTES FORTRAN code for the spreadwork function model	E T R Dean	1986
175	3-dimensional purely plastic constitutive model for anisotropic sand	K V Venter	1986

174	An improved soil model for one-dimensional pile driving analysis	M F Randolph H A Simons	1985
173	Centrifuge model test data for earthquakes on sand embankments and islands	F H Lee	1985
172	Exterior states	E T R Dean	1985
171	Capacity of piles driven into dense sand	M F Randolph	1985
170	Vibration tests data on the bumpy road	F H Lee	1985
169	Pore pressures in simple shear	D W Airey	1986
168	Glossary of terms used in nuclear industry	F S Lau	1986
167	List of abbreviations used in nuclear waste management	F S Lau	1986
166	-	-	-
165	-	-	-
164	-	-	-
163	Settlement of pile groups	M F Randolph	1985
162	Shaft capacity of driven piles in clay	M F Randolph B S Murphy	1985
161	Experiments with crushed glass	D M Wood	1984
160	Centrifuge modelling of artificial sand islands in earthquakes	F H Lee A N Schofield	1984
159	A new approach to one-dimensional pile-driving analysis	H Simons M F Randolph	1984
158	Analysis and design of pile groups using a microcomputer	M F Randolph	1984
157	Centrifuge study of spill-thro abutments	M F Randolph C Y Ah Teck R T Murray	1984
156	Index properties and critical state soil mechanics	D M Wood	1984
155	Some aspects of the behaviour of soils in simple shear	D W Airey M Budhu D M Wood	1984
154	Modelling the seismic resistance of retaining structures	M D Bolton R S Steedman	1984
153	The deformation of ground near tunnels and trenches	M J Gunn	1984
152	The strength and dilatancy of sands	M D Bolton	1984
151	-	-	-
150	Earthquake induced pore pressures in the foundation of a sea dyke	A N Schofield K Venter	1984
149	Comparison of transmitting boundaries in dynamic finite element analyses using explicit time integration	H Simons M F Randolph	1984
148	The behaviour of fixed cantilever walls subject to lateral shaking	M D Bolton R S Steedman	1984

147	The limiting pressure on a circular pile loaded laterally in cohesive soil	M F Randolph G T Houlsby	1984
		R J Mair	
146	Applications of centrifuge modelling to the design of tunnels and excavating in soft clay	R Phillips A N Schofield R N Taylor	1984
145	Tension pile behaviour in clay -centrifuge modelling techniques	M F Randolph I L Nunez	1984
144	The effects of heat transfer from a hot penetrator installed in the ocean bed	M F Randolph I L Nunez	1984
143	Designs of piled raft foundations	D V Maddocks C Savvidou	1984
142	Studies of vane and penetrometer tests during centrifuge flight	M F Randolph	1984
141	Tests with centrifuge vane and penetrometer in a normal gravity field	M S S Almeida R H G Parry	1983
140	Some centrifugal test results on the grain size effect in physical modelling	KW Mak	1983
139	Centrifuge earthquake data for retaining walls	R S Steedman	1983
138	Effect of disturbance on parameters derived from self- boring pressure-meter tests in sand	M Fahey M F Randolph	1983
137	Consolidation of a cross anisotropic soil medium	J R Booker M F Randolph	1983
136	A note on the mechanics of the assemblages of particles	C M Szalwinski	1983
135	Consolidation around a heat source	J R Booker C Savvidou	1983
134	Two centrifuge model tests: earthquakes in submerged embankments	E T R Dean A N Schofield	1983
133	Gravity flow of particulate materials in bunkers	T W Cousens R G James	1983
132	A transducer to measure the pore water pressure acting on the surface of a driven, steel pile	D V Maddocks	1983
131	A transducer to measure the radial effective soil stress and the pore water pressure acting on the surface of a driven, steel pile	D V Maddocks	1983
130	Flexibility of a contact point of an isotropic elastic body	C M Szalwinski	1983
129	Continuum mechanics for particulate media	C M Szalwinski	1982
128	General description of the FEASAS package	C M Szalwinski	1982
127	Recent developments in the understanding of the axial capacity of piles in clay	M F Randolph C P Wroth	1982
126	Choice of models for geotechnical predictions	D M Wood	1982
125			1982

124	Experimental observations of shear band patterns in direct shear tests	G Scarpelli D M Wood	1982
123	Centrifuge Studies	A N Schofield	1982
122	On the stability of supported excavation	A M Britto O Kusakabe	1983
121	Finite element analyses of a trial embankment in soft clay	M S Almeida J A Ramalho- Ortigiio	1982
120	Centrifugal testing of microconcrete retaining walls subjected to base shaking	M D Bolton R S Steedman	1982
119	The undrained behaviour of the Rio de Janeiro clay in the light of critical state theories	M S Almeida	1982
118	Stability of axisymmetric excavations in normally consolidated clays	A M Britto O Kusakabe	1982
117	Rectangular open pit excavations in normally consolidated clays	O Kusakabe A N Schofield	1981
116	Estimating the flexibility of offshore pile groups	M F Randolph H G Poulos	1981
115	HOMEP -An algorithm for analysing homogeneous stress/strain histories	C M Szalwinski	1981
114	A review of numerical methods for the analysis and design of soft ground tunnels	M Gunn	1981
113	The development of a transducer to measure the effective soil stresses and the pore water pressure acting on the surface of a driven, steel pile	D V Maddocks	1981
112	Settlement considerations in the design of axially loaded piles	D V Maddocks	1981
111	Analysis of seepage into a cylindrical permeameter	M F Randolph	1981
110	PMA TRX the algorithm for transforming N- dimensional data into plotted curves	M F Randolph J R Booker	1981
109	Automatic element reordering for finite element analysis with frontal solution schemes	S W Sloan M F Randolph	1981
108	Cyclic lateral loading of small scale piles on a centrifuge	P J Hoadley Y O Barton	1981
107	Ground movements around shallow tunnels in soft clay	R J Mair M J Gunn M P O'Reilly	1981
106	Determining the shear strength of clay cakes used in centrifuge model tests	R H G Parry M C R Davies	1981
105	Stability of unsupported axisymmetric excavations in soft clay	A M Britto O Kusakabe	1981
104	Dynamic and earthquake geotechnical centrifuge modelling	A N Schofield	1981
103	Limit state design in geotechnical engineering	M D Bolton	1981

102	Collapse limit states of reinforced earth retaining walls	M D Bolton P D Lang	1981
101	Cone penetrometer and liquid limit	D M Wood	1981
100	To Chunam or not to Chunam: interaction of politics and slope stability	D M Wood	1980
99	Model tests on instrumented piles jacked into clay	J S Steenfelt M F Randolph C P Wroth	1981
98	HOMEP -an automatic integration for stress and strain path processing	C M Szalwinski	1980
97	Stress states in the tests on sand in the simple shear apparatus	D M Wood	1980
96	Microstructural model: predictions for simple shear	D M Wood	1980
95	True triaxial tests on Boston Blue Clay	D M Wood	1980
94	The response of flexible piles to lateral loading	M F Randolph	1980
93	Centrifugal model to evaluate numerical methods	R H Bassett M C R Davies M J Gunn R H G Parry	1980
92	Geotechnical centrifuge	A N Schofield	1980
91	PIGLET: a computer program for the analysis and design of pile groups under general loading conditions	M F Randolph	1980
90	Application of the failure state in undrained simple shear to the shaft capacity of driven piles	M F Randolph C P Wroth	1980
89	Analysis of the behaviour of piles subjected to torsion	M F Randolph	1980
88	Numerical prediction of collapse loads using finite element methods	M F Randolph	1980
87	A fast stiffness formulation for finite element analysis of 2-dimensional solids	S W Sloan	1980
86	Cambridge geotechnical centrifuge operations	A N Schofield	1980
85	Some factors which influence the shear strength of reinforced sand	R A Jewell	1980
84	Laboratory investigations of the behaviour of soils under cyclic loading: a review	D M Wood	1980
83	Laboratory studies of the pressuremeter test in sand	R J Jewell M Fahey C P Wroth	1980
82	Limit analysis of undrained stability problems using a very small computer	M J Gunn	1980
81	Modelling of a tunnel failure in silt	R N Taylor	1980
80	The stability of shallow tunnel and underground openings in cohesive material	E H Davis M J Gunn	1979

		R J Mair H N Seneviratne	
79	-	-	
78	Engineering approximations: the finite element method (in structural mechanics)	C M Szalwinski	1979
77	A "bumpy road" actuator for a centrifuge shake table	P W Turner	1979
76	Future developments in geotechnics 10-25 years	A N Schofield	1979
75	A review of the engineering properties of soils with particular reference	C P Wroth M F Randolph G T Houlsby M Fahey	1979
74	Some implications of the derivation of small-strain incremental theory of plasticity from thermo-mechanics	G T Houlsby	1979
73	The development of centrifugal models to study the influence of uplift pressures on the stability of a floodbank -continued studies	C J Padfield A N Schofield	1979
72	The effect of an overburden layer on the stability of the Mississippi riverbanks	C J Padfield A N Schofield	1979
71	The generation of a flowslide in a layer of sand	C J Padfield	1979
