

GEOTECHNICAL ENGINEERING

March 2019: Special Issue in Unsaturated Soils – Testing, Modelling and Applications

Edited by:
Eng-Choon Leong & Hossam Abuel-Naga

TABLE OF CONTENTS

<u>List of Papers</u>	<u>Page</u>
1: Water Retention Characteristics of Swelling Clays By Kannan R. Iyer and D. N. Singh	
2: Water Retention and Unsaturated Hydraulic Behaviors of a Biochar-modified Silt By Abraham C.F. Chiu, B. Qiao and Y. Xiao	
3: Investigation of a Nonisothermal Apparent Thermal Conductivity Function for Unsaturated Sand By R.A. Samarakoon, and J.S. McCartney	
4: Simple Approach to Monitor Soil Moisture Dynamic in Vapour Equilibrium Cell By Y. Lu, Z. Shang, Hossam Abuel-Naga	
5: A Classification Tree Guide to Soil-water Characteristic Curve Test for Soils with Bimodal Grain-size Distribution By L. Zou and E.C. Leong	
6: Back Pressure Saturation Effects on the Mechanical Behaviour of a Quasi-Saturated Compacted Residual Soil By G.G. Carnero-Guzman and F.A.M. Marinho	
7: Induced and Inherent Anisotropies of Saturated and Unsaturated Soil Shear Properties By H. Toyota, B. N. Le and S. Takada	
8: Modeling of Unsaturated Soil Aided by Probability and Statistics By R. Kitamura and K. Sako	
9: Elastoplastic Modelling of Hydro-mechanical Behaviour of Unsaturated Soils By J.R. Zhang, D.A. Sun and W.J. Sun	
10: Interpretation of Desiccation Soil Cracking in the Framework of Unsaturated Soil Mechanics By H. Al-Dakheeli and R. Bulut	
11: Field Response of an Instrumented Dyke subjected to Rainfall By A. Jotisankasa, S. Pramusandi, S. Nishimura and S. Chaiprakaikeow	
12: Simplified Shear Deformation Method for Analysis of Mechanical Behavior of Pile Foundations in Expansive Soils By Y. Liu and S.K. Vanapalli	
13: Validation of Foundation Design Method on Expansive Soils By K.C. Chao and J.D. Nelson	

GEOTECHNICAL ENGINEERING

June 2019: Issue on Buried Pipelines

Edited by:
Dr Jey Jeyapalan

TABLE OF CONTENTS

<u>List of Papers</u>	<u>Page</u>
1: Long-term Deformation Monitoring of CERN Concrete-lined Tunnels using Distributed Fibre-optic Sensing <i>By V. Di Murro, L. Pelecanos, K. Soga, C. Kechavarzi, R.F. Morton, L. Scibile</i>	1-7
2: Distributed Brillouin Sensing for Geotechnical Infrastructure: Capabilities and Challenges <i>By N. Noether and S. von der Mark</i>	8-12
3: State-of-the Art of Geotechnical Monitoring with Geodetic Techniques <i>By W. Lienhart</i>	13-20
4: Performance Assessment and Failure Prediction of Corroded Cast Iron Pipes <i>By P. Rajeev and D. Robert</i>	21-27
5: Comparative Study of Distributed Sensors for Strain Monitoring of Pipelines <i>By B. Glisic</i>	28-35
6: Instrumented Laterally Loaded Pile Test Using Distributed Fibre Optic Sensors <i>By H. Mohamad, B.P. Tee, M.F. Chong, K.A. Ang, A.S.A. Rashid and R.A. Abdullah</i>	36-42
7: Distributed Fibre Optic Sensing for Monitoring Reinforced Concrete Piles <i>By C. Kechavarzi, L. Pelecanos, N. de Battista and K. Soga</i>	43-51
8: State-of-the Art Knowledge on Upheaval Buckling of Buried Pipelines <i>By Indrasenan Thusyanthan and Dilan Robert</i>	52-59
9: Cost Effective Free Span Rectification for Offshore Pipelines <i>By Indrasenan Thusyanthan</i>	60-63
10: Distributed Optical Fiber Sensors for Strain and Deformation Monitoring of Pipelines and Penstocks <i>By D. Inaudi</i>	64-70
11: A Methodology for Identification of Pipe Failure Hotspots <i>By Ravin N Deo, Chunshun Zhang, Jian Ji, Suranji Rathnayaka, Benjamin Shannon, Jayantha K Kodikara</i>	71-76
12: ADYTrack: Development of a Railroad Trackbed Model and Parametric Study of Track Modulus <i>By Asif Arshid, Ying Huang, and Denver Tolliver</i>	77-84

13: Leakage- induced Pipeline Stressing and its Potential Detection by Distributed Fiber Optic Sensing <i>By A. Klar, A., Linker, R. and Herrmann, S.</i>	85-90
14: Smart Geosynthetics based on Distributed Fiber-optic Sensors in Geotechnical Engineering <i>By A. Wosniok and K. Krebber</i>	91-95
15: Loss of Flexibility in Geosynthetics Subjected to Chemical Exposure: Experiments, Constitutive Models and Computations and Estimates for Contaminant Leakage <i>By A. P.S. Selvadurai</i>	96-106
16: Monitoring of Buried Pipeline using Distributed Fibre Optic Technologies: Combined Acoustic-Temperature-Strain sensing <i>By C. Prohasky, R. Vivekanantham, P.Rajeev, H. Bao, and S. Roy</i>	107-112
17. Benefits of Standards for Fiber-optic Sensors in Soil-structure Interaction <i>By W. R. Habel and J. K. Jeyapalan</i>	113-124
18. Rational Methods of Steel Pipe Design Accounting for Poor Native Soils and Soil Migration <i>By J. K. Jeyapalan, G. Leonhardt, P. Rajeev, and A. M. Britto</i>	125-130
19. Technical Challenges and Solutions for Super-Long Mountainous Tunnels at Great Depth <i>By Yan Jinxiu</i>	131-135
20. Risk Analysis and Countermeasure Study of Shield Tunnelling in Karst Stratum of China by <i>By Zhong Changping, Zhu Weibin, Huang Weiran, Zhu Siran and Xu Minghui</i>	136-140

Cover Photograph

- Benefits of standards for fiber-optic sensors in soil-structure interaction
By W. R. Habel and J. K. Jeyapalan
- Long-term Deformation Monitoring of CERN Concrete-lined Tunnels using Distributed Fibre-optic Sensing
By V. Di Murro, L. Pelecanos, K. Soga, C. Kechavarzi, R.F. Morton, L. Scibile
- State-of-the Art of Geotechnical Monitoring with Geodetic Techniques
By W. Lienhart
- State-of-the Art Knowledge on Upheaval Buckling of Buried Pipelines
By N. I. Thusyanthan and D. Robert
- Distributed Optical Fiber Sensors for Strain and Deformation Monitoring of Pipelines and Penstocks
By D. Inaudi
- Smart Geosynthetics based on Distributed Fiber Optic Sensors in Geotechnical Engineering
By A. Wosniok and K. Krebber
- Leakage-Induced Pipeline Stressing and its Potential Detection by Distributed Fiber Optic Sensing
By A. Klar, R. Linker and S. Herrmann
- Loss of flexibility in geosynthetics subjected to chemical exposure: Experiments, constitutive models and computations and estimates for contaminant leakage
By A. P.S. Selvadurai
